	Examiner Renee S. Luebke	Art Unit 2833	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2833

1. Claims 6-14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to nonelected inventions, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on September 21, 2004.

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

3. The drawings are objected to because the use of double numbers, for example 36(30), is improper and confusing. Each lead line should indicate a unique member or feature. In addition, it is recommended that reference numerals be numeric, not alpha-numeric.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in

Art Unit: 2833

the next Office action. The objection to the drawings will not be held in abeyance.

4. Claims 1-5 are objected to because of the following informalities:

- Claim 1 lacks antecedent basis for “the inclined electric contact part” and “the corrected electric contact part” on the last two lines.
- Claims 2 and 3 each lack antecedent basis for “the electric contact parts” on line 2 and “the cavity parts” on line 5.
- Claim 3 is seen to be the same as claim 2 and will not be allowed in view thereof. The only difference between the claims is the substitution of “inclined” for “tapered” and the meaning of both of these terms is the same in the present context.

Appropriate correction is required.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Kato. This mounting structure of a junction box comprises a terminal part 109 of a busbar 107, a housing member 102, and a projecting piece 104 surrounding a cavity. The electric contact part 109a of the busbar is inserted into the cavity. The terminal part and the housing member form a connector. The electric contact part is inserted into the cavity by way of the inclined/tapered faces 1 in order to correct any potential misalignments.

Art Unit: 2833

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Saito, et al. and Sato comprise similar arrangements for correcting contact parts.

8. Claims 4 and 5 would be allowable if rewritten to overcome the objections set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

9. Any response to this action may be mailed to:
